

SANLORENZO

Sanlorenzo's advance in the metal sector

Sanlorenzo superyacht closes the sale of the third and fourth units of the 57 Steel and launches the second 62 Steel

Press Release, 20 September 2021 - The perfect **balance between proportions and volumes** and the extraordinary **indoor and outdoor spaces** of the **57 Steel**, are amongst the latest additions to Sanlorenzo's superyacht fleet, that are conquering the international market. An unstoppable progress that has led to the **sale of the 3rd and 4th units** of the 57 Steel, the latter concluded by the Bulgarian dealer **Best Boats Only**.

Confirming Sanlorenzo's commitment to significantly reducing the impact of yacht use on the marine ecosystem, the 3rd vessel, **sold in collaboration with** Russian dealer **West Nautical**, will be equipped with a **new generation diesel-electric propulsion system** that will see a significant evolution in terms of energy efficiency and reduced footprint and will be integrated with the latest generation of lithium battery and hotel management systems.

A superyacht with a straight bow, which confers her great character, alongside contemporary lines of extreme formal cleanliness that draw their strength from the stylistic heritage of Sanlorenzo. The 57 Steel is the result of intense typological research carried out by the shipyard together with **Studio Zuccon International Project**, which has led to the creation of a **56.70 metre long yacht with 5 decks and a tonnage of 1050 GT**.

"The versatility of use that distinguishes the spaces on board is a key element of the 57 Steel, it makes it possible to satisfy the many requests of a heterogeneous and multicultural market like that of superyachts. A model in which there is no ostentation of the brand and whose external lines have a defined and extremely fluid, transparent and clear trend in which the language of the shipyard shines through. We can define 57 Steel as a skillful balancing act between content and container".

Bernardo Zuccon

The large volumes, which strongly characterise this model, have been obtained through the creation of an **innovative layout that alters the traditional balance on board**: the wheelhouse area, normally at the bow of the upper deck, has been relocated to an additional deck - a real bridge deck as on larger yachts - thus making it possible to use the *upper deck* in a different way.

This is where the **owner's cabin** is located, a 54 msq space overlooking the very large **Owner Deck**, a private deck from which to enjoy an exclusive view of the infinite sea.

The new layout has also made it possible to create a **spacious full-beam VIP cabin at the bow of the main deck**, which can be used as a second owner's cabin.

One of the features most appreciated of the 57 Steel is the **extraordinary 110 msq beach area**, created by opening hatches on three sides which become small beaches on the water's edge, illuminated by the transparent-bottomed swimming pool on the main deck, and the decision to place the **garage at the bow**, which has made it possible to create a large space equipped to house tenders of up to 7.5 metres and numerous toys.

At the same time as the sale of the two 57 Steels, Sanlorenzo **launches the 2nd unit of the 62 Steel**, a 61.50-metre superyacht with a maximum beam of 11.90 metres, a gross tonnage of 1300 tonnes and five decks.

This model is **full of comfortable spaces** that provide a truly special experience for Sanlorenzo owners in their private moments of *loisir*.

Starting from the **vast private area of the owner's suite**, a good 215 msq, on the **upper deck**, which, in addition to enjoying an unparalleled 180° panoramic view, is linked to the outdoor area in the bow of over 140msq, with large sunbathing and relaxation areas and a swimming pool. An entire deck for the exclusive use of the owner.

Competing with the title of "place to be" on board of the 62 Steel, is the very pleasant **Beach Club at sea level**, lit by the transparent base of the swimming pool, aft of the main deck, where the owner and guests can enjoy a large area, which is literally a **private beach** which **extend sunder cover for 92 sqm**, with areas to relax, a bar area, gym and hammam, plus **another 40 msq of folding terraces** aft and on both sides that offer guests the chance to enjoy the sea "*au fil de l'eau*" for swimming, diving and sunbathing enhanced by the shimmering sea.

To completely free up space in the beach area, the 62 Steel has been designed with **two garages with access** through lateral openings, midship, which contain the main 9 metre tender to starboard and the service tender and jet ski to port.

The **62 Steel Cloud 9**, the first unit in the line, will be on display at the **Monaco Yacht Show from 22 to 25 September**.
